Summary

B.Tech Information Technology graduate with knowledge of Java, Object-Oriented Programming (OOP), and Data Structures & Algorithms (DSA). Experienced in developing REST APIs, backend services, and full-stack web applications using Java and modern web technologies. Familiar with SQL, Git, debugging, testing, and database management. Interested in AIOps, monitoring, and AI-assisted development tools. A quick learner with strong problem-solving, communication, and teamwork skills, eager to learn and contribute in a software engineering role.

Skills

Languages: Java, Python, JavaScript, C++, SQL

Tools & Technologies: REST APIs, Spring Boot, React.js, Node.js, MongoDB, MySQL, Git, AI-assisted coding tools (GitHub Copilot)

Interests: Object Oriented Programming, Data Structures & Algorithms, Database Management Systems, System Design

Internship Experience

Web Development Intern – ennoViQ Educator & DLQ Technologies

Oct 2023 – Dec 2024

Gained hands-on experience in full-stack web development, contributing to backend modules, REST APIs, and responsive user interfaces using modern web technologies. Participated in debugging, testing, and code reviews, strengthening problem-solving skills and software development practices. Developed a solid understanding of front-end/back-end integration, database management, and application reliability.

Projects

Blockchain-Based Smart City Complaint System

Tech: React.js, Node.js, MongoDB, Blockchain, Smart Contracts

- Built a **full-stack decentralized complaint management system** using React.js frontend, Node.js backend, and MongoDB, allowing citizens to submit city complaints online with real-time tracking.
- Integrated **blockchain smart contracts** to ensure data immutability, preventing tampering of complaint records
- Designed a role-based complaint workflow for citizens and administrators, enabling complaint registration, status updates, and efficient grievance resolution through a user-friendly interface.

URL Shortener with Analytics

Tech: Spring Boot, React.js, JWT, MySQL, Docker

- Developed a full-stack URL shortening platform using **Spring Boot** and **React.js**, enabling users to create, manage, and share shortened URLs with custom aliases.
- Implemented secure **JWT-based authentication**, RESTful APIs, and integrated **MySQL** with Spring Data JPA for efficient URL storage and management.
- Built features including **click analytics**, **QR code generation**, link expiration, and containerized the application using **Docker** for simplified deployment.

Education

Velammal Engineering College

Nov 2022 – 2026

B.Tech in Information Technology | CGPA : 7.99

Sri Vaiyapuri Vidyalaya Matric Higher Secondary School

Higher Secondary Certificate (HSC) | Percentage:86.6%

2022

Sri Vaiyapuri Vidyalaya Matric Higher Secondary School

Secondary School Leaving Certificate (SSLC) | Percnetage:82%

2020

Certifications

- Google AI Certification** – Completed the Google AI certification program, gaining expertise in machine learning concepts, AI applications, and model fundamentals.
- C & C++ Programming Certification** – Earned certification demonstrating proficiency in C and C++ programming, data structures, algorithms, and problem-solving skills.

Participations

- Solved **200+ coding problems** on LeetCode, strengthening algorithmic thinking and data structures.
- Secured **1st Place** at XTfest 6.0 conducted by SSEC, awarded ₹2000 cash prize
